RETROFIT DOORS | HEATER MODELS

EXISTING RECESS BOX + NEW OUTDOOR RE / REP HEATER

WHICH NEW HEATER WORKS WITH THESE DOORS?

Rinnai lists these OUTDOOR heater models for all three door kits: 109001313, 109001365 and 109001374.

APPROVED HEATER	MANUFACTURER MODEL CODE
RE199e	REU-VE2737WD-US
REP199e	REU-VEP2730WD-US
RE180e	REU-VE2432WD-US
RE160e	REU-VE2125WD-US
REP160e	REU-VEP2125WD
RE140e	REU-VE1720WD-US

BOX LABEL FIRST. SIZE ALONE IS NOT ENOUGH.

RGB-25U family: the source drawing shows a 1.3-inch (33 mm) lip. RGB-25 and Allspec both show a 0.5-inch (13 mm) lip, so that dimension alone cannot tell those two boxes apart. The Allspec fit requires two locking pins and a cam lock.

KEEP THE HEATER FAMILY SEPARATE

This chart is for the listed outdoor RE / REP models. It does not establish compatibility for indoor i models or RX / RXP units. Match the full heater rating plate, including natural gas or propane, before ordering the heater.

BOX LABEL MISSING? Send NWS a photo of the entire existing box and its lock hardware before choosing a door kit.
